The Second International Workshop on Lysenkoism has been funded by a Science Technology and Society grant from the National Science Foundation. Without NSF support the organization of this meeting would not have been possible. Thanks also to the Faculty of Cultural and Historical Studies at the University of Vienna for their support, and a special thanks to Mitchell Ash and Carola Sachse for agreeing to host the workshop. I am very grateful as well to Jérôme Segal as well to helping me manage the numerous details that go into organizing a conference. Finally, thanks once again to Darren Byler for a fantastic job designing the conference materials.
